

Let's Talk About Aloe Vera – Mother's Nature "Miracle Plant"

There's a good chance that you've used aloe vera to treat a cut or wound with great results. You should consider drinking it daily too. Here's why...

Did you know that aloe vera was used on the victims of the Oklahoma City bombing in 1995? Everyone from the doctors to the injured saw firsthand the amazing healing properties of aloe vera. In fact, their reduced pain levels and healing time far exceeded even the doctors' best expectations. Aloe vera proved to directly encourage tissue regeneration.

Now imagine, if aloe can have this impact topically, what it can do internally when you drink it in liquid form.

Proclaimed throughout history as Mother Nature's miracle plant, aloe has shown health-supporting benefits including enhancing digestion, natural cleansing, and detoxification, boosting the immune system, calming the nervous system, and possessing anti-inflammatory properties. It is for these reasons that aloe is an integral part of the formula we know as Body Balance.

All aloe vera products are NOT created equal.

Some aloe vera products contain little or none of the active ingredients necessary to benefit the body. As a result, a nonprofit agency known as the International Aloe Science Council (IASC) was formed, and today it provides independent testing of aloe products.

Body Balance is unique.

The aloe vera used in Body Balance is certified by the IASC, which means it meets or exceeds all standards for aloe purity. It is also certified organically grown and kosher grown in fertile fields at the base of a volcanic mountain in Mexico. This location is significant because here the fields are fed with water rich in volcanic trace minerals.

Based on our belief in the amazing benefits of aloe and our use of superior quality aloe, we recommend Body Balance as your first source of aloe vera and daily nutrition.
